# A Patented approach

Designed and assembled  
in Canada

Moblek's Utility Patent abstract:

A charging system for wirelessly charging a smart device configured to provide an advertising message.

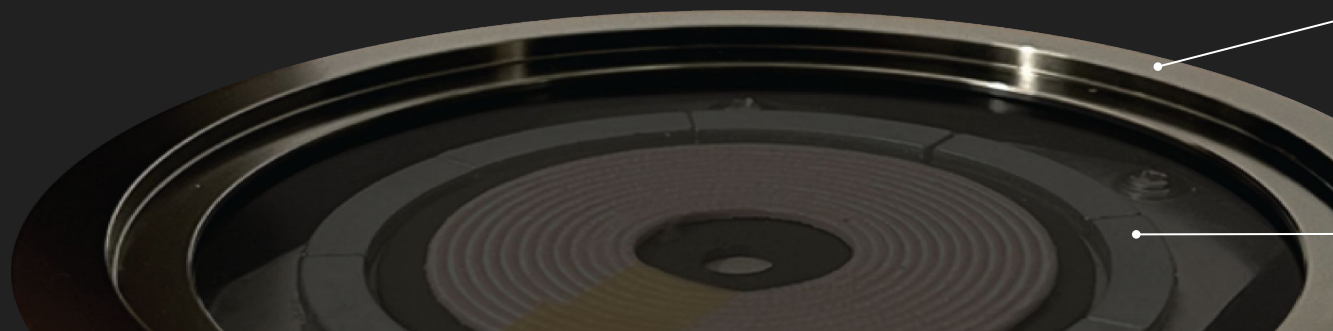

# How it works..

Designed and assembled  
in Canada

# Moblek's technology

Stainless Steel 316

Integrated magnet  
alignment system  
compatible with  
**Apple « MagSafe »**

A certified technology that is 100% efficient and compatible with both Android and iOS devices.

Our system is recognized by the new iPhone ecosystem, making us an exclusive, high-end product.

Only built with quality components for durability.

Fast charge (Intelligent Identification System).

Our solution integrates an alignment system that helps new iPhone (12-13-14) to centre perfectly as a MagSafe compatible system.

Each solution is assembled by hand.

Water resistant for all kinds of environment.

# Wireless Charging Market

Market Cap : USD 51.17 billion in 2022 (vs USD 17.48 billion in 2021).

Expected to reach USD 185.91 billion by 2030 (CAGR of 29.4%).

# About us

Moblek is an innovative Canadian company that integrates smart wireless charging solutions with a unique branding and marketing concept.

Moblek's innovation is characterized by its International Intellectual Property, including patents, trademarks, copyrights and Industrial Design in more than 35 countries around the world.

Our patented solution adapts perfectly to the design of your private, public or commercial establishments. It stands out for its concept according to your needs and your image.

Designed and assembled in Canada, our product is at the forefront of technology; it is reliable, efficient, safe and very elegant.

Our services range from the creation of the desired design and installation, to help you to generate income through the sale of advertising concept.

Our product is a "**must-have**" in different commercial and private areas, thanks to the constant evolution of technology, since future smartphones generation won't have charging port in order to improve the water resistance and the design.
